DETAILED ACTION

Applicant's election **without** traverse of Group I, claims 1-18, 27, 28, in phone conversation on 3/1/07 is acknowledged. Claims 19-26, 29-33 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention. Furthermore, claims 3, 8-12, 13-15, and 28 are withdrawn as being drawn to a non-elected species. Specifically, claim 3 is drawn to figs. 8A-8B due to the T shaped element, claims 13-15 are drawn to fig. 3A due to a the vacuum, and claims 8-12 and 28 are drawn to fig. 7 due to the coil spring and U shaped body. Therefore, claims 1, 2, 4-7, 16-18, and 27 are drawn to the election of species A, figure 3B, and will be examined on the merits.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 18 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Specifically, claim 19 recites that the patient is an animal, however, there is no explanation or mention in the instant disclosure of how the invention can be utilized in an animal or what type of animal.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Solar et al. (US-5947983).

Solar discloses:

Regarding **claim 1**, an external member (110); and an internal member (120) rotatably coupled to said external member (col.3, lines 7-9), said internal member having at least one receiver (111) for receiving said at least one suture (fig.2E, 145).

Regarding **claim 2**, at least one suture is passed through said at least one receiver in said internal member (fig. 2E), said at least one suture being coupled to portions of said wound (fig. 2E) and tightened by rotating said internal member in a first direction to draw said portions of said wound toward one another (col.3. line 63-col.4, line 2).

Claims 4-7, 16-18 and 27 are rejected under 35 U.S.C. 102(b) as being anticipated by Cosmetto et al. (US-5127412).

Cosmetto discloses:

Regarding **claim 4**, a body (30) having a at least one aperture (35) extending radially through said body; and a shaft (40) at least partially disposed within and

Application/Control Number: 10/762,884

Art Unit: 3731

rotatably coupled to said body (12), said shaft having a plurality of apertures (41) and/or slots substantially in line with said at least one aperture in said body, said plurality of apertures spaced apart from one another and extending radially through said shaft (fig.17).

Regarding **claim 5**, said device is inherently capable for placement within said wound.

Regarding **claim 6**, said sutures (41) are passed through said at least one aperture in said body and said plurality of apertures in said shaft, said sutures being coupled to portions of said wound and tightened by rotating said shaft in a first direction to draw said portions of said wound toward one another (figs. 5, 6, 9, 10).

Regarding **claim 7**, means for preventing said shaft from rotating in a direction opposite to said first direction (45).

Regarding **claim 16**, a means for applying a rotational force to an end of said shaft to rotate said shaft with respect to said body (12).

Regarding **claims 17 and 18**, Cosmetto discloses using the wound closure device for a patient (col.5, line 43), wherein it is old and well known in the art that the patient is human, and furthermore that an animal, broadly interpreted, is also a human.

Regarding claim 27, a tubular body (30) having a first plurality of apertures (35) extending radially through said tubular body, said plurality of apertures spaced apart from one another along a length of said tubular body (fig. 17 and 18); and a shaft (40) disposed within and rotatably coupled to said tubular body (12), said shaft having a respective plurality of apertures (41) and/or slots substantially in line with said apertures

Application/Control Number: 10/762,884 Page 5

Art Unit: 3731

in said tubular body, said respective plurality of apertures spaced apart from one another and extending radially through said shaft (fig. 17 and 18).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pavitra Kotini whose telephone number is 571-272-0624. The examiner can normally be reached on M-F 8:30am to 6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anhtuan Nguyen can be reached on 571-272-4963. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
